PROFILE

Backend-focused Full Stack Developer with formal training in Laravel, PHP, and MySQL, backed by 4+ years of professional web development experience (since 2022) delivering UI solutions for medical and pharmaceutical clients before transitioning into full-stack engineering — recognized as Top Performer in Route Academy's Back-end (PHP & Laravel) diploma. Skilled in RESTful API design, authentication & authorization, database design and optimization, and OOP/MVC architecture. Comfortable owning a project end-to-end, from requirements analysis to deployment. Currently expanding into AI-assisted development practices.

PROFESSIONAL EXPERIENCE

UI Developer → Full-Stack Developer (Backend-Focused)
CAT (Creative Advertising Thinking) — 2022 – Present

- Delivered front-end/UI solutions for medical and pharmaceutical clients — responsive web pages, e-detailers, HTML email campaigns, sitemaps, and interactive interfaces (HTML5, CSS3, JavaScript, Bootstrap).
- Transitioned into full-stack development: designed and built backend systems using Laravel, PHP, and MySQL — authentication, CRUD operations, RESTful APIs, validation, and database design — while maintaining dynamic Vue.js front-ends end-to-end.
- Bridged business stakeholders and technical implementation, translating client requirements into working web solutions across the full development lifecycle.

EDUCATION

Back-end (PHP & Laravel) Diploma 10/2025 – 04/2026
Route academy
recognized as Top Performer (April 2026)

Frontend Development(vue js) Diploma 02/2025 – 07/2025
route academy
recognized for Outstanding Performance (July 2025)

B.Sc. in Electronics and Communications Engineering 2018
Menouf

CONTINUOUS LEARNING

- Code Smarter with AI — Eng. Usama Elgendy, Software Engineer (7 hrs, Completed July 2026)
- Claude AI Masterclass — Arabic (4.5 hrs, Completed)
- AI Coder: From Vibe Coder to Agentic Engineer (15 hrs, In Progress)

TECHNICAL SKILLS

Backend
- PHP (OOP)
- Laravel
- MySQL
- RESTful APIs
- MVC Architecture
- Blade Templates
- Authentication & Authorization
- Eloquent ORM & Relationships
- Middleware & Routing
- Git
- Design patterns
- Redis/Caching

Frontend
- HTML5, CSS3
- Bootstrap, Tailwind CSS
- JavaScript (ES6+)
- Vue.js
- Vue Router
- State Management (Pinia)

DESIGN TOOLS
- Adobe Photoshop
- Adobe Illustrator
- Adobe InDesign
- Adobe Acrobat, Microsoft PowerPoint

PROJECTS

E-commerce-Laravel 04/2026 – 04/2026
Full-featured E-commerce web application built with Laravel, featuring product management, shopping cart, order processing, wishlist, and admin dashboard.

Booking API 04/2026 – 04/2026
an efficient Booking System API built using Laravel, designed to manage events and reservations smoothly. The project uses Form Requests for validation, Eager Loading for optimized database queries, and implements seat locking to prevent double booking and ensure data consistency.

Dynamic website generator 03/2026 – 03/2026
Built a dynamic website generator that transforms user input from forms into fully structured websites. The project highlights automation, user-friendly design, and scalable architecture for rapid website creatio

Online Shop System | PHP + MySQL 03/2026 – 03/2026
Developed a full-featured e-commerce system using native PHP with OOP and MySQL, implementing full CRUD operations, server-side validation, and a clean, MVC-inspired code structure. Focused on backend architecture, object-oriented principles (Encapsulation, Abstraction, Separation of Concerns), and maintainable, scalable code.

Dynamic dashboard 03/2026 – 03/2026
Developed a PHP Native web application with a dynamic dashboard, MySQL database integration, and full CRUD operations. Features include image uploads and efficient data management, showcasing strong backend development skills in PHP without frameworks.

Taskify | PHP + MySQL 02/2026 – 02/2026
Developed a Task Management System from scratch using pure PHP and MySQL, focusing on backend logic and database design. Implemented user authentication, CRUD operations for tasks, task status tracking, and time tracking, with a clean, organized code structure and responsive UI. Gained hands-on experience in PHP logic, database handling, and basic security.

ToDo List | PHP Native 02/2026 – 02/2026
Developed a full-featured ToDo List application using pure PHP with OOP and PDO for secure database operations. Implemented all CRUD operations, user validation, and data processing natively, focusing on clean, reusable code and protection against SQL injection. Technologies: PHP Native, OOP, PDO, CRUD, Data Validation.

Blog System 01/2026 – 01/2026
PHP + MySQL Developed a full-featured blog with user authentication, role-based access, multilingual support, CRUD operations, image uploads, pagination, and an admin dashboard. Technologies: PHP, MySQL, HTML, CSS, JavaScript.

E-commerce Web App (Vue.js) 06/2025 – 07/2025
A responsive online store with cart, checkout, API integration, and user authentication. Developed with Vue.js, Vue Router, and Pinia/Vuex, featuring product listing, filters, dynamic cart, and responsive UI using TailwindCSS.

GameOver Web App (Pure JavaScript) 05/2025 – 06/2025
A fully interactive JS application with authentication, API integration, and dynamic UI. Built with pure JavaScript, including Login/Register, dynamic DOM rendering, routing-like navigation, search, and category filtering.

Yummy Web App (HTML / JavaScript / jQuery) 04/2025 – 05/2025
Meals & Recipes app with login system, API integration, and dynamic UI. Built with HTML, CSS, JS, and jQuery, featuring form validation, search, filters, dynamic rendering, and responsive layout.

Personal Portfolio Website 02/2025 – 03/2025
A responsive portfolio showcasing skills, projects, and contact info. Built with HTML, CSS, JS, featuring interactive layout, smooth scrolling, project showcase with live demos, and fully responsive design.

SOFT SKILLS

- Leadership & Team Management
- Time Management
- abilty to adapt with different characters
- Strong understanding of business processes and operational workflows gained through managing and supporting multiple business projects.
- Able to bridge the gap between business stakeholders and development teams, ensuring that products meet both business and user requirements.
- Communication & Collaboration
- Sales & Negotiation
- Ability to learn and work under pressure
- Experienced in requirements gathering, business analysis, and converting business needs into effective technical solutions.
